

DATA ANALYSIS

Project Title: Data Cleaning and Preprocessing

Task Description:

Clean and preprocess a dataset containing missing values, duplicates and outliers. Prepare a clean dataset for analysis.

Responsibilities:

- Identify and handle missing data.
- Remove duplicates.
- Detect and address outliers.
- Perform basic data transformations like scaling or encoding categorical variables.
- Skills Required: Data cleaning, data preprocessing, basic data manipulation using tools like Python libraries (such as Pandas), SQL or Excel for data cleaning tasks.
